DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 recites the limitation "the range" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-8 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Aquilina (6363993). Aquilina discloses an articulated door having a flexible hanging which covers the width of an opening and is made up of a plurality of panels 50, 52 and 54, hinged together at stiffening members 18, so as to be able to be oriented at different angles relative to one another, lateral guide tracks 140, wheels 40, to fit into and move along the guide tracks, hinges 12, stiffening member that are parallel to the panels and flush to their surface when mounted to them, and reinforcing strips 22, parallel to the panels that fit into and permanently connected to an undercut groove. The flexible hanging has a hanging plane, created by door in its entirety and a hanging plane, which is defined by the axis of pivot around which each panel rotates relative to the adjacent panels. Both planes are in immediate vicinity of each other without coinciding.

Response to Arguments

Applicant's arguments filed 5/3/23/07 have been fully considered but they are not persuasive. The applicant's attention is drawn to page 12 of the remarks. The applicant states that the Aquilina reference has stiff door panels, this is true. However as stated in claim 1 the applicant states "a flexible hanging". The examiner interpreted hanging and the entire curtain, which is flexible due to the hinges between each panel. The applicant also states that Aquilina does not disclose a gate body with a plurality of stiffening profile members extending transversely to the lateral guide across the gate body and connecting to the hinge member, however Aquilina disclose stiffening profile members 18, with that configuration, as best seen in Figures 1 and 3.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

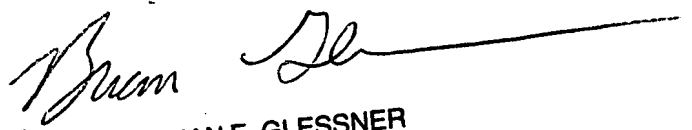

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
